

ADHD & AUTISM SEMINAR

**Saturday, June 13, 2009
9:00am-12:00pm**

“There is Hope for Autism!”

**Sandra L. Spore, RN, DC, CCN, NMD
(Defeat Autism Now! Referral Physician)**

**Country Inn & Suites
6003 Hudson Road
Woodbury, MN 55125**

With 1 in every 150 children diagnosed with autism, the prevalence of AD(H)D and Autism is staggering in this day and age. Have you ever wondered why? Genetics certainly play a role, but it is not the main trigger. There is a much more in-depth realization that every parent needs to understand in order to aid their child in a productive life. This seminar will give you the understanding of how genetics, biochemistry, immune system issues, and toxic are affecting our children and what steps you can take to help. Other topics will include the connection between chronic inflammation of the brain, the immune system and the digestive system.

Seminar Registration Fee:

\$25

(Special thanks to Dr. Spore for donating her time)
